

Canadian Door Institute - COVID 19 Pandemic

In these unprecedented times, our Essential Services must be maintained. Hospitals and Care facilities, Police, Fire, and Ambulance services, Manufacturing and Research facilities, and the Transportation infrastructure that link them all must function. People also need to be able to go to grocery stores and, if required, to seek health care. Critical to that are the products and services provided by the Door and Gate industry. Our Industry supplies, installs, and services doors and gates, including garage doors, rolling doors, fire doors, high-performance doors, and security gates, and their motor automation and control systems, all of which provide crucial access and egress to our country's essential buildings and facilities, as well as to people's residences.

The Canadian Door Institute and its members support the steps taken by public health officials to combat COVID-19 and to reduce its spread. Responsible member companies have embraced the recommendations so that they are ready take care of essential service facilities when called upon. Our industry consists of well-trained and highly skilled men and women who have the specialized skill set required to keep our nation's doors and gates operational. Our services are critical to the continued operation of essential services and we call upon public officials to recognize our industry as essential.

Michael Plecash
